Compiler's note: Fifty years of Badgers cricket - who would have thunk it?? I did consider adding lifetime and decade-by-decade statistics to this document, as a supplement to the 'These Fifty Years' booklet produced for the fiftieth celebration, but that would have meant yet another proper print run and it seemed such a waste when all of the information is readily available on the website and pretty much all of the current, and many past, members have access to t'InterWeb. If you are not familiar with the site then you can find the address on the front cover of this document and you will find a treasure trove of information about the club covering the full fifty years of its existence.

In closing I'd like to say a big THANK YOU to Jacqueline for helping me check a full year's worth of data against the scorebooks and to Janet for putting up with my continued obsession with the club (you would think I'd have grown out of it at my age!?) which yet again meant that I managed to play in every weekend game in the season just gone.

Have a good winter Badgers and we'll hopefully see you all regularly in 2009.

In the above table 'Ave. Batt. Pos.' is the player's average position in the batting order, when they actually got to bat (ie. excluding 'Did Not Bats'); 'Strike Rate' is the number of wickets per one hundred balls bowled (ie. the bigger the number, the 'better' the bowler as far as wicket-taking goes).
